BATTERY FITTING

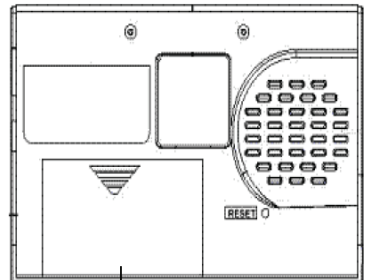

Your translator is powered by two AAA batteries in the main power supply. When the power lever of the batteries is low, the sound becomes weak and hoarse, the display is dim. If happens, replace 2xAAA alkaline battery immediately. The actual service life depends on the batteries you use, we recommend:

- Replace the 2 pcs AAA batteries supplied with the unit not longer than 3 months of purchasing.
- When inserting new batteries to be sure to insert them ensuring proper polarity (+ , -) .
- Never mix batteries of different types.
- Never mix old batteries and new ones.
- Never leave dead batteries in the battery compartment.
- If the Translator is not used for an extended period of time, please remove the batteries.

Replacing the main battery:

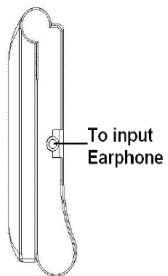

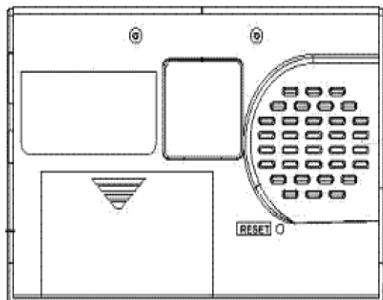

Before replacing the main battery.

- a) Turn off the machine.
- b) Slide off the battery door according the direction of the arrow indicated. The battery door is linkage with translator case.
- c) Remove the old batteries and replace 2 PCS AAA batteries (1.5 V, SUM-4, R3) in the correct polarity corresponding to the symbol indicated inside the battery compartment.
- d) Make sure that the batteries make a good contact with the metal plates.
- e) Cover the battery door.

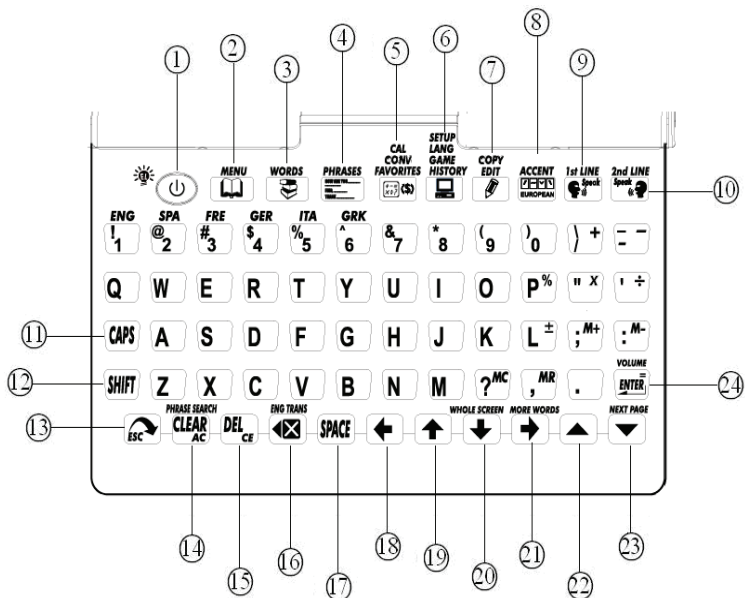

Battery door
